- Lights
- Case

#### Options Available:

Choice of fabric colors, see page 24

#### Product Description:

Radium Table Top 2x2 kit with a curved frame. The popup display system combines strength and reliability with style and ease of use. Named "popup" because of its "small to large" pop-up action, this type of display system is still one of the most portable trade show and display solutions available. The Radium pop up system features several unique advantages over other similar Popup display systems, especially its light weight and simplistic ease of use. Compared with complicated "snap in" channel bars and delicate locking/locating systems, the popup display system uses state-of-the-art "rare earth neo magnets" on both its channel bars and locking/locating systems. These make it very quick and simple to erect and take down, with practically no "easy-to-break" part.
